

Minor

Energy Engineering Minor

Sandeep Kumar, Department of Civil and Environmental Engineering,
Coordinator

This interdisciplinary minor is for students who would like to learn about energy engineering fundamentals, socio-environmental impacts of energy systems, and novel energy engineering technologies. The minor will enhance students' abilities to integrate knowledge from different disciplines with concepts used in energy engineering and offer students the opportunity to be recognized for study in this growing interdisciplinary field.

Requirements

The interdisciplinary minor requires 12 credit hours of 300/400-level courses selected from at least two different disciplines with a maximum of six credits from any one discipline. The course requirements are as follows:

Four courses chosen from: 12

CET 355	Sustainable Building Practices
CEE 458	Sustainable Development
CEE 459	Biofuels Engineering
ECE 303	Introduction to Electrical Power
ECE 403	Power Electronics
ECE 471	Introduction to Solar Cells
ECON 447W	Natural Resource and Environmental Economics
EET 370	Energy and The Environment
EET 483	Introduction to Smart Grids
EET 485	Electrical Power Systems
ENMA 301	Introduction to Engineering Management
ENMA 302	Engineering Economics
MAE 411	Mechanical Engineering Power Systems Theory and Design
MAE 413	Energy Conversion
MET 300	Thermodynamics
MET 471	Nuclear Systems I
OEAS 415	Waves and Tides
PHYS 415	Introduction to Nuclear and Particle Physics

One course relevant to energy engineering from the student's major can also be used as a minor course with the approval of the minor coordinator.

For completion of the minor, students must have a minimum overall grade point average of 2.00 in all courses specified as a requirement for the minor exclusive of prerequisites. At least six hours of the required 12 must be taken through courses offered by Old Dominion University.
